Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Use an approved AI assistant with a structured prompt, source boundary and human review method for everyday HR work.
- LO2: Design bounded recruitment, onboarding, employee-support and communication agents with job-related criteria and explicit human decisions.
- LO3: Build and test a multi-step HR workflow that connects approved data and tools while preserving exceptions, approvals and run evidence.
- LO4: Evaluate privacy, fairness, security and operating risk, then produce a staged rollout plan with owners, metrics, monitoring and fallback.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.
